PLANS FOR DREDGING HARBOR

Lieutenant Slattery, U. S. A., engineering officer attached to the Hawaiian Islands, yesterday began the preliminary surveys for the improvement of Honolulu harbor and channel. He expects to receive orders by any mail to advertise for bids for the work. The labor of making the surveys will take about two months.

Lieut. Slattery hopes to open the bids by July 1, and not later than July 20. No bids are to be received at any place other than Lieut. Slattery's office in the Young block. Congress has made an appropriation of \$400,000 for this great work, and it is well to take note that in this connection the Territory is expending about \$300,000 to build new slips and wharves at the foot of Alakea street. When both works are completed the largest vessels afloat can be accommodated in Honolulu harbor.

The channel is to be made about 150 feet wider than at present, and this will entail the removal of the existing port lighthouse. The site for the new lighthouse is 400 feet farther seaward. Twenty months is the time required to complete the dredging of the harbor and widening the channel. An average depth of 35 feet will be made.

FLOATING MINES IN MID-PACIFIC

SAN FRANCISCO, May 9.—A mine is drifting about the mid-Pacific, and until this menace to life and property is destroyed travelers on the ocean will view speeding on dark nights with great apprehension. News to this effect was brought here by the little trading schooner Triton, which arrived yesterday.

The schooner arrived from the Marshall Islands and reported that on April 21, in latitude 37 degrees and 21 minutes north and longitude 169 degrees west, a large object was seen bearing down on the vessel. A turn was given to the wheel and the schooner passed by the object. At first it was thought to be a buoy adrift, but, on a close examination, it was found to be a floating mine.

O. Williams, who has charge of the gasoline engines of the vessel, and who appears to be well informed as to the mechanism of submarine mines, says that he saw long pieces of electric wire attached to the object.

The schooner also reports seeing several immense turtles swimming about in mid-ocean. They were seen in about latitude 25 degrees north and longitude 168 degrees west.

WASHINGTON, May 8.—Minister Conger, in what was probably the last report from China, dated Pekin, March 29, suggests to the State Department that one or two small vessels be detailed to destroy the floating mines which are endangering commerce in the sea between Shanghai and Northern Chinese ports.

WIRELESS FROM HAWAII TO COAST POSSIBLE

WASHINGTON, May 6.—Perhaps it will be possible after all to establish wireless communication between San Francisco and Hawaii, in a long-distance step across the Pacific. There are physical characteristics at Honolulu which experts expected would interfere somewhat with the development of the system, but the Bureau of Equipment is in receipt of two offers to construct the stations which will accomplish the desired result and effect an exchange of messages through a distance of 2089 miles.

One offer comes from the Marconi people and the other from those representing the Telefunken system. The Marconi company is adhering to its former stipulation, that its system will be used in exchanging messages with stations equipped with rival apparatus. This is objectionable, because, no matter what achievement is possible with the Marconi installation, it would not do to tie up the Government facilities of communication in any such exclusive manner.

MONGOLIA SAILS FOR THE COAST

Crowded with passengers the big Pacific Mail liner Mongolia left port last night for San Francisco. She arrived from the Orient at about eight o'clock in the morning but was delayed on account of a Japanese stow-away who could not be found when the doctor inspected the ship. The liner finally docked at about ten o'clock. She sailed again at 5:30 after discharging 700 tons of freight.

The big steamer had 999 passengers aboard, 7 cabin and 410 steerage for Honolulu, 118 being Japanese, 5 Chinese and 288 Koreans. There were 164 through cabin passengers, 22 white steerage, 4 Japanese and 388 Chinese. There was 7522 tons of cargo. The steamer had a fine run across from Yokohama.

Among the Honolulu passengers was Captain H. W. Lyon, U. S. N., commandant at the naval station who is returning from duty on the court martial that tried Capt. Briggs of the Baltimore for running that ship aground in the Orient.

There was a party of naval officers on the through list who have been on the same duty. Among them were Rear Admiral Miller, U. S. N., Capt. F. E. Sawyer, U. S. N., Capt. F. J. Drake, U. S. N. and Lt. Com. J. E. Craven, U. S. N. Lt. Com. J. W. Egan, U. S. N., is returning from duty on the Asiatic station.

Pierre Lorillard Jr. is a son of the famous capitalist and horseman, Count H. D. Von Bray is a Bavarian nobleman and Count Kinjro Hiroawa is a Japanese peer on a tour to the States. Many Honolulu people departed on the liner and leis were in evidence although the band was not present.

WIRELESS OUTFIT COMING.

VALLEJO, May 11.—One of the most important items of the big cargo which the United States Navy transport Solace will carry when she leaves Mare Island Navy Yard tomorrow afternoon en route to Manila will be the outfit for wireless telegraph stations at Honolulu and Guam. The apparatus, which has been constructed by the navy yard workmen, is the latest and most improved pattern.

Lieutenant George C. Sweet and a crew of operators for the new stations will go out on the Solace and erect the plants. Lieutenant Sweet formerly had charge of the Mare Island wireless station, leaving here a year ago to superintend the establishment of wireless stations in the Philippines. The Solace and the Lawton will remain at San Francisco until Monday afternoon at 4 o'clock, when they will sail to the Orient together.—San Francisco Call.

COPTIC IN PORT.

The Occidental and Oriental liner Coptic arrived off port from San Francisco yesterday morning at about nine o'clock and shortly afterward docked at the Walkiki side of the Hackfeld wharf, leaving the Ewa side for the Mongolia. The steamer made the run down in five days and twenty hours and had good weather. She has a small passenger list and 4000 tons of freight for the Orient. As some of this is pretty valuable to the Japanese, the Coptic will call at Midway, to ascertain whether Togo or Rojostevsky is master of the seas. The steamer will sail for Yokohama at nine o'clock this morning, carrying the Oriental mail.

LONG PASSAGES.

The bark Annie Johnson, usually one of the fastest of the sugar vessels, is now out nineteen days from Honolulu. The schooner Sehoma is out twenty-one days from Mahukona. Of the deep-sea vessels about due, the British ship Dunsyre is out 157 days from Antwerp, the British ship Thistle is 170 days out from Hamburg, the British ship Barcore is out 148 days from Newcastle, Eng.; the British bark Battle Abbey is out 85 days, and the British ship Brodiek Castle is out 82 days from Newcastle, Aus.—Chronicle, May 8.

The new lighthouse at Lahaina will be completed this week and will be turned over to Commander Niblack, U. S. N., the lighthouse inspector. The lighthouse is 55 feet in height and stands 60 feet 3 inches above sea level.

Lieut. Slattery will leave for Hilo this month to make surveys for the Hilo breakwater. There is an appropriation for the survey, but no money has been appropriated for the building of a breakwater. Lieut. Slattery will make an investigation of the stone on Hawaii that may be available for the work.

SELF CURE NO FICTION!

MARVEL UPON MARVEL! NO SUFFERER NEED NOW DESPAIR, but without running a doctor's bill or falling into the deep ditch of quackery, may safely, speedily, and economically cure himself without the knowledge of a second party. By the introduction of the New French Remedy, THERAPION, a complete revolution has been wrought in this department of medical science, whilst thousands have been restored to health and happiness who for years previously had been merely dragging out a miserable existence.

THERAPION No. 1 is a remarkably short time, often a few days only, effects a cure, superseding injections, the use of which does irreparable harm by laying the foundation of stricture and other serious diseases.

THERAPION

THERAPION No. 2, for impurity of the blood, scurvy, pimples, spots, blotches, pains and swellings of the joints, gout, rheumatism, secondary symptoms, etc. This preparation purifies the whole system through the blood and thoroughly eliminates all poisonous matter from the body.

A GOOD YEAR FOR OAHU COLLEGE

The third annual meeting of trustees and teachers of Oahu College was held last night in the parlors of Bingham Hall. Reports were read by the heads of departments. These reports gave a brief resume of work and conditions and of plans for the future. All showed that the year was a most successful one, a large increase in attendance being reported from all departments. This condition of prosperity was especially shown in the college, the preparatory school and the department of music. In the manual training department there were indications of great interest. A special feature here was the production of articles of real value by the students. There was a discussion on the location of the kindergarten, which is fast outgrowing its present quarters.

The trustees granted leaves of absence to Mrs. Gerard Barton who expects to pursue her musical studies abroad for a year; to Miss Mary G. Borden who will prolong her vacation one term and to Miss Katherine M. Graydon who will spend a year in recuperation in the States.

In the report of President Griffiths there was a discussion of the boarding department. He took up its needs and dwelt somewhat on the plans for its development in the future when, by the generosity of friends of the school, new halls and new dormitories will give this department an equipment second to none. After the formal part of the program had been concluded the wives of the trustees and men teachers joined the gathering and a social evening was spent.
